TOWN OF PERU

Temporary Moratorium of the Development and Permitting of Data Centers

1. Purpose: The purpose of this temporary moratorium is to allow the Selectboard and the Planning Board adequate time to study the impacts of data processing facilities on local water usage, electrical grid capacity, noise levels, and environmental and Government resources.

2. Definitions: A data center is defined as a building or series of buildings, designed or used to house and support high-performance computing infrastructure, servers, networking equipment, and associated data storage systems. This definition includes all related cooling systems, backup power generation, and dedicated electrical infrastructure.

3. Moratorium Imposed: Effective immediately upon passage, there is imposed a 180-day moratorium on the acceptance, processing, and approval of any building applications, site plans, building permits or other development approvals for the construction or operation any Data Centers within the Town of Peru.

4. Exemptions: The provisions of this moratorium shall not apply to routine upgrades to existing telecommunication facilities.

5. Effective Date and Expiration: This moratorium shall take effect immediately upon passage. Unless repealed, extended, or replaced by subsequent legislative action. This moratorium shall automatically expire 180 days from the effective date.
