The following is a summary of the estimated costs involved, at an assumed rate of 4.00% and a bond principal repayment schedule of 30 years.

Bond Principal Amount to Be Issued if Approved:	$5,500,000
Estimated Cost of Interest if Approved:	$3,410,000
Total Estimated Cost if Approved:	$8,910,000

Bonding Limit

The bonding limit of the Town is set forth in 30-A M.R.S. Section 5702, which provides: "No municipality may incur debt which would cause its total debt outstanding at any time, exclusive of debt incurred for school purposes, for storm or sanitary sewer purposes, for energy facility purposes or for municipal airport purposes to exceed 7 1/2% of its last full state valuation, or any lower percentage or amount that a municipality may set. A municipality may incur debt for school purposes to an amount outstanding at any time not exceeding 10% of its last full state valuation, or any lower percentage or amount that a municipality may set, for storm or sanitary sewer purposes to an amount outstanding at any time not exceeding 7 1/2% of its last full state valuation, or any lower percentage or amount that a municipality may set, and for municipal airport and special district purposes to an amount outstanding at any time not exceeding 3% of its last full state valuation, or any lower percentage or amount that a municipality may set; provided, however, that in no event may any municipality incur debt which would cause its total debt outstanding at any time to exceed 15% of its last full state valuation, or any lower percentage or amount that a municipality may set. For the purposes of this section, full state valuation shall mean the state valuation most recently certified by the State Tax Assessor pursuant to Title 36, section 381, adjusted to 100%." The 2026 State Valuation of the Town is $6,939,150,000.

Note as to Estimates and Validity

When money is borrowed by issuing bonds, the Town must repay not only the principal amount of the bonds but also interest on the bonds. The amount of interest to be paid will vary depending upon the rate of interest and the years to maturity at the time of issue. The validity of the bonds and of the voters' ratification of the bonds may not be affected by any errors in the estimates made of the costs involved, including varying interest rates, the estimated cost of interest on the bond amount to be issued and the total cost of principal and interest to be paid at maturity. If the actual amount of the total debt service for the bonds varies from the estimate, the ratification by the voters is nevertheless conclusive and the validity of the bonds is not affected by reason of the variance.
